

# Mobile Shops

Mobile shops from which food is to be sold must have an interior finish that is in keeping with the intentions of the Food Hygiene Regulations 1974. Certain structural elements of the Regulations will not be able to be carried out in anything other than a permanent building, so the matters that will require special attention are:

- The floor of the mobile shop must have a vinyl floor covering fixed in place with a waterproof adhesive and coved at the margins.
- Walls and ceiling of the mobile shop must be constructed (lined) with a waterproof material that can be easily cleaned.
- Where the food is to be consumed in the state in which it is sold, the mobile shop must be fitted with a wash-hand basin that has hot and cold running water supplied to it, and a wastewater tank. If the food that is to be sold is prepackaged, then an alcohol gel hand sanitiser will suffice.
- The mobile shop must have sufficient refrigeration to keep all readily perishable food from spoiling.
